## Finest Home Furniture, Designed & Made In India

With love and passion, by a team of designers, engineers, colour-material specialists and dedicated craftsmen, using modern manufacturing processes, automotive tech & Indian ergonomic standards.

Big Bear is a brand new furniture startup which brings together the perfect amalgamation of form, function and culture.

We have our background in the automotive industry and our sofas and chairs are designed and manufactured using the same automotive tech.

Of course we put in a lot of love and care and fret over the minutest detail, just so that you can snuggle up in that perfect seat.
